

## Percentile Chart

\* A **percentile chart** measures the current price against the full range of the price over a period of time.i.e Select an indicator price and look to see where that particular indicator is in relation to the full range of the price movement over the period measured..

\* This is particularly useful when evaluating a **futures or forward** price.

\* Look also at the graphs elsewhere on the web site and they will demonstrate **when** various price levels have been achieved.

\* The composition of the NMI has altered over the period since March 1991 and the figure quoted reflects only that published by AWEX at the close of each week.

\* The **Mean** is the average c/kg since cessation of the floor price scheme.

\* The **Median** is the middle c/kg level of all market data collected since cessation of the floor price scheme.
