## Classer's Specification

### **IMPORTANT:**

*These reports should be faxed progressively (for larger clips) or before the last consignment leaves the property (smaller clips). Receipt of the classer's specification, either prior to receipt of clip or with consignments (per carrier), ensures efficient handling and prompt test results.*

*The classer should indicate if shearing has been completed and if not which completed lines can be treated immediately.*

## Weighing your bales

**Minimum bale weight: 120 kgs**  
**Maximum bale weight: 204 kgs**

Presenting bales outside this range costs growers money and seriously affects procedures during marketing and processing wool.

## Avoid contamination

- Ensure every bale is completely free of harmful foreign material.
- DO NOT mix different wool types within a bale.
- Ensure correct bale branding.
- Only ever use PAPER as a divider in bales destined for rehandling.

## Definitions for Mulesing Status

|                         |   |
|-------------------------|---|
| 1. Non Mulesed (NM)     | No sheep in this mob have been mulesed.   |
| 2. Ceased Mulesing (CM) | Wool from sheep where mulesing has ceased on the property. No lambs born on this property in the last 12 months have been mulesed. No purchased sheep are mulesed.      |
| 3. Pain Relief (PR)     | All sheep in this mob have been mulesed during a registered pain relief product (Note: PR must be declared separately for each mob - it is NOT a property declaration). |
| 4. Mulesed (M)          | Some or all sheep in this mob have been mulesed.  |

### TIPS

- Shake out packs before use
- Do not press wet wool
- Report faulty packs to AWEX
- Use plenty of paper between Bulk Class portions

**Maximum** bale length = 1.25m

**Maximum** bale weight = 204kg (including Bulk Class)

## Weighing your bales

**Minimum bale weight: 120 kgs**  
**Maximum bale weight: 204 kgs**

Presenting bales outside this range costs growers money and seriously affects procedures during marketing and processing wool.

## Avoid contamination

- Ensure every bale is completely free of harmful foreign material.
- DO NOT mix different wool types within a bale.
- Ensure correct bale branding.
- Only ever use PAPER as a divider in bales destined for rehandling.

## Definitions for Mulesing Status

|                         |   |
|-------------------------|---|
| 1. Non Mulesed (NM)     | No sheep in this mob have been mulesed.   |
| 2. Ceased Mulesing (CM) | Wool from sheep where mulesing has ceased on the property. No lambs born on this property in the last 12 months have been mulesed. No purchased sheep are mulesed.      |
| 3. Pain Relief (PR)     | All sheep in this mob have been mulesed during a registered pain relief product (Note: PR must be declared separately for each mob - it is NOT a property declaration). |
| 4. Mulesed (M)          | Some or all sheep in this mob have been mulesed.  |
