2019 Annual Ram Sale

[VIEW 2019 ONLINE CATALOGUE](#)

FULLERTON MERINO STUD are pleased to announce their 2019 sale date. The helmsman auction will be held on Friday, the 1st of February at 3pm on the grounds of the Laggan Pub. Inspections begin at 1pm. There are 40 horned and poll one year old rams for sale. The rams are well grown, productive, robust and showing the evenness of type which we have been breeding for.

The 2018 season has been challenging for merinos producers. Despite the drier conditions, Fullerton Merino Stud's sheep have maintained their fleece weights and continued to express their genetic potential. The 2019 sale team's bodyweight is already 6% heavier than the sale team this time last year. 2019 sale team's average micron is 18.9, with an SD of 2.9. The micron range is from 17- 21um, with a strong emphasis on maintaining a low SD. The entire sale team is paddock run and unhoused. Sale team were shorn on the 1st of September. Fullerton Merino Stud sale rams are current with Gudair, 6-1, Scabbiguard vaccinations and Brucellosis accredited.

Fullerton Merino have invested in poll genetics via West Plains Poll, One Oak Poll and Yarrawonga Poll stud this year. The first of Fullerton Merino poll lambs are on the ground now, and available in 2019's sale. Fullerton Merino are diversifying with poll rams, but still envisage continuing horn progeny in the future.

Fullerton Merino's progression is through fertility, allowing heavy maiden ewe classing. 2017's lambing average was 120%, with the 5 year lambing average at 104%. Percentages like this drive profit.

After visual classing, all maiden ewes are fleece tested and fleece weighed. This has occurred since 1997. Inspections are welcome by contacting Kim, Robyn or Jock Cartwright;
